Biomedical Blockchain Initiatives

There is tremendous interest and opportunity to apply blockchain technologies to problems in biology, medicine and health. We have created this repository to map all of the biomedical blockchain initiatives worldwide in order to track the evolution of this emerging technology.

Check out [this blog post](#) for a complete description of our approach and methodology. Contributions are welcome and encouraged.

Legend

Criteria for mention:

- Code:** Must be publicly available and non-trivial. White papers, tokens/token sales, road maps, forks without additional work, etc. are not considered.
- Demo:** Must have a publicly available demo or working product. Private betas are not considered.
- Technical Documentation (Docs):** Must have a publicly available technical whitepaper/specification. Non-technical implementations are not considered.
- Professional investment (\$MM):** USD raised from professional investors.
